## PROJECTS

### Tetris

Live: <https://www.awettech.com/tetris>

Repo: <https://github.com/awetmelake/tetrisv2>

Tetris clone made with vanilla JavaScript, Html and CSS and following MVC architecture. Code is separated into each element of the MVC design for easy maintenance. Uses HTML canvas as the view.

### Taskflow

Live: <https://taskflow.awettech.com>

Repo: <https://github.com/awetmelake/myTaskManagerApp>

An in-depth completely personalizable task manager web app built in React that's based on the Japanese Kanban system. Allows users to organize their schedule and manage time through timers and time tracking functionality. Authorization handled with Google Firebase Auth and storage with Google Cloud Firestore for real time updates.

### MovieDB

Live: <https://moviedb.awettech.com>

Repo: <https://github.com/awetmelake/movieapp>

React application that uses the Open Movie Database Api to let users search from 1000's of media titles and add or delete them from their watchlist. Authorization handled with Google Firebase Auth and storage with Google Cloud Firestore for real time updates.

### Weather app

Live: <https://weather.awettech.com>

Repo: <https://github.com/awetmelake/weatherapp>

React application that uses Weather API to let users get the forecast for their area. Find current forecast and hourly forecast, wind speed, and various other info coupled with icons signifying the conditions.

## SKILLS

HTML / CSS

Sass / Bootstrap

JavaScript / jQuery

React / Redux

NoSQL

Node.js / NPM

Git / Version control / Cli

Familiarity with  
cross-browser compatibility

## ABOUT

I'm an avid self-taught front-end developer who's focused and willing to master any technology I put my mind to.

## EDUCATION

### University of Minnesota Twin Cities

College of Education and Human Dev.
